UI Walkthrough

On the home pages there is a menu button that opens up the below view. On this page users can change their profile pictures as well as select a new category to view.

When a new category is clicked, the view segues back to the "Home" page with the information and posts for that category

The Favorites View Controller is a table view that consists of the posts that are saved to core data by the user. The user has the option to delete from this table as well by swiping left on the cell

The main view controller shows a table of posts for a given category. In this example the "All" category.

On the home page (for each category) there is a compose new post button that allows users to create a new post for that particular category

When a post's cell is selected a new page is shown with the whole post as well as any comments related to the post

When viewing the page for a post there is a compose button on the toolbar that allows a user to compose a new comment
